Autoline™

Swivel Lines

- Swivel gear specially designed for longlining
- Choose from Metal Stoppers or Plastic Flexi Stoppers
- Lines: Polyester or Scanline (50-50 mix of nylon and polyester)
- Perfect for hand baiting

LONG LIFE SWIVELS AND LINES

Polyurethane Flexistoppers and patented steel swivels meet the requirement for strength and functionality. The swivel rotates perfectly around the mainline and is strong enough to resist opening, bending and crushing.

Polyurethane Flexi-Stoppers reduce wear to mainline, sheaves and other Autoline equipment. Polyurethane is a flexible material, which flexes and stretches with the line without "clipping" mainline fibers.
